PRODUCT DESCRIPTION

Designer: Arturo Alvarez

Arturo Alvarez Hipatia LED Portable Table Lamp

This Arturo Alvarez LED portable lamp is simple and highly versatile. The design is based on functionality and ease of use. However, this does not compromise the beauty of the design as its choice of material and texture make this lamp a stunning addition anywhere in your home. The rechargeable battery allows you to take this lamp wherever you go as it adds ambience and atmosphere to any space. The Hipatia portable lamp gives you 6 hours of bright diffused light from one single charge. This light can be dimmed and controlled using two methods. The first is the **integrated dimmer on the base of the lamp**, this button can be pressed once for on, once for off, and held down to dim. The second is the **remote control provided**, this allows you to turn your Hipatia portable lamp on and off and also dim the light source from a maximum of 10 meters away. This feature makes this outdoor lamp a breeze to control and adjust, allowing you to illuminate your outdoor space with a simple click of a button.

The Hipatia LED portable outdoor lamp also has two charging options that make keeping this stunning lamp full of charge as easy as possible. The first charging option is the **included USB cable** that can be plugged into the base of the lamp and into any plug socket in your home. The second charging option is with the **included charging base**. This base can be charged up prior to use using the USB cable provided. Then, once your Hipatia starts running low on energy, you can place your Hipatia on the pre-charged charging base and watch as your Arturo Alvarez portable lamp regains its energy. This charging base and remote control make the Hipatia completely cordless and allow for freedom of use. Ideal for indoor and outdoor use, this portable LED lamp can light your garden or home with ease.
