PRODUCT DESCRIPTION

Designer: Serge & Robert Cornelissen

Paraph LED Floor Lamp by Prandina

Designed in 2011, the Paraph LED floor lamp is defined by its striking swirled aesthetic. The floor lamp has a built-in LED light source, emitting a 3000K (warm white) colour temperature that is both strong and effective. The head can be adjusted, and the body can rotate fully on the base, allowing you to direct the light where you need.

The modern look of the Paraph floor light means it can slip into any contemporary home or professional setting and can be used for lounges, dining rooms and many more spaces. The floor lamp is perfect for reading and tasks because of the directed light and will be an eye-catching addition to the room. Match this floor lamp with the [Paraph LED table lamp](#) to create a coherent light scheme.

This version of the Paraph floor lamp is non-dimmable. A dimmable version is available on request. Please [contact us](#) for further enquiries.

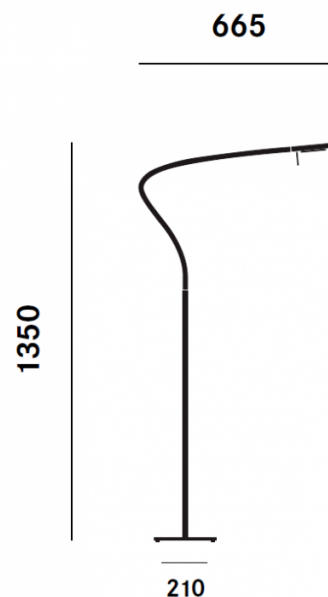

PRODUCT SPECIFICATION
