PRODUCT DESCRIPTION

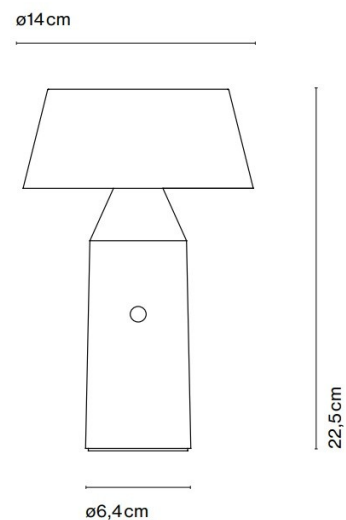

Designer: Christophe Mathieu

Marset Bicoca LED Portable Lamp

The Marset Bicoca LED Portable Table Lamp was designed by Christophe Mathieu who has become one of Marset's veteran designers and has created several successful products. One of these is the Bicoca LED portable which is available in six finishes which are off-white, anthracite, red wine, light blue, pale pink, and Yellow. The selection of finishes provides an option for any taste and any space such as a workspace, dining table, or bedside. The integrated dimmer also allows you to alter the dimming settings with ease at the touch of a button.

The portable nature of the Bicoca LED table lamp means that this product is chargeable and can be easily moved around the home with cordless freedom. When fully charged, the table lamp can last up to 5 hours on peak power and up to 20 hours on a quarter power. This ability to be mobile around the home was an important feature for the designer as he aimed to create an object that 'brightens life and accompanies the good times, wherever you go'.
