PRODUCT DESCRIPTION

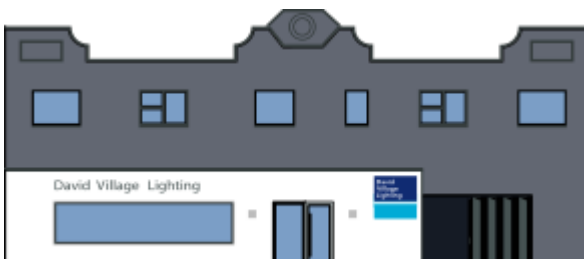

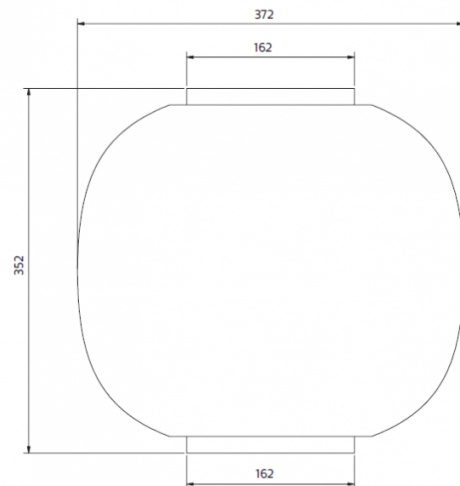

Haze Pendant Light by Zero

New for 2020, Zero lighting have released the Haze pendant light, an interpretation of an oriental lantern with a contemporary twist. The outer shade cover is made from woven fabric, giving a textured and organic look to the lamp. The inner shade is made from opal acrylic, diffusing the light bulb to create a warm, soft glow. The name of the pendant comes from the effect created when the light is switched on. The fabric creates a faded effect on the edges of the pendant light, producing a hazy aesthetic. The light is topped and bottomed by lovely wooden rings, again creating an organic and natural look.

The Haze pendant is a lovely light that can work well both in homes and offices and will work particularly well in lounge areas as it is dimmable to create the atmosphere you like. A light created with many influences, it is available in 3 colours so you can find the right fit for your space.
