PRODUCT DESCRIPTION

Designer: Jean Prouvé

Petite Potence Wall Light by Vitra

Designed by Jean Prouvé in the 1940s for his own home, the Petite Potence wall lamp is the smaller version of the [Potence wall light](#). The wall light is characterised by its swivelling metal body that can be moved from side to side to direct the light where you want. The pure and functional nature of this wall lamp makes it fresh and modern, despite being created in the 20th century, and has enjoyed success for many decades.

An iconic design, the Petite Potence wall light is available in a range of colours, allowing you to find the right match for your design scheme. The wall light is perfect for smaller interiors and works well as both an atmospheric and reading/task light. The Petite Potence is also dimmable with an included dimmable light bulb and dimmer switch.

This light needs to be installed near a socket as it comes with a cable and plug.
