PRODUCT DESCRIPTION

Designer: Tom Dixon

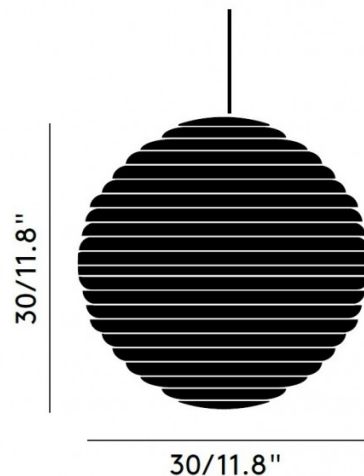

Press Sphere LED Pendant Light by Tom Dixon

The Press Sphere pendant is made from clear glass which has gorgeous ripples to diffuse and refract the light source. The lampshade is made by dropping molten glass at 1200°C that is then pressed in pressurised iron moulds to create a thick and durable light.

The Press Sphere pendant lamp can be used in many interiors, whether at home or at work. The pendant can be used alone or in multiple for an effective illumination. You can also match the pendant light with other lights from the [Tom Dixon Press collection](#) for a mesmerising lighting scheme.
