PRODUCT DESCRIPTION

Designer: Ludovica & Roberto Palomba

Foscarini Gregg Wall Light

The Foscarini Gregg Wall Light was designed by Ludovica and Roberto Palomba who use their joint expertise in architecture, interior and product design to create objects that interact in an 'immediate way'. Also known as the Gregg Piccola IP44, the stylish Foscarini Gregg Wall Light is made of blown glass that is formed into the shape of a pebble, described by the designers as resembling the shape of 'an egg laid by a mythological beast'.

The design of the glass diffuser means that the light source is screened in and cannot be seen from any angle. This means that the lamp has an uninterrupted, sleek look that conceals any dazzling light and only allows a soft ambient diffused light into the surroundings. The mounting options also demonstrate how durable this wall light is as it can be placed outside or even in a bathroom environment. With an IP of 44, this lamp may look delicate but also has a durability that makes this Wall light unique in the [Foscarini Gregg collection](#).

The versatile mirror mounting option allows you to enjoy the simplicity of this lamp in bathrooms. The sleek design means that the mirror amplifies the unique shape of the glass-blown shade that changes as the point of view of the observer changes. The unique mirror mounting option means you can create your own Gregg Piccola Mirror that will beautifully brighten any room.
