PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Melt LED Chandelier

An eye-catching addition to the bestselling [Tom Dixon Melt Collection](#), the Melt chandelier takes the iconic lampshade to produce a contemporary and innovative suspension. The chandelier is made using polycarbonate with a mirrored finish which turns translucent as the light is switched on. This creates a beautiful swirling effect, creating wondrous colours and hues that will draw the eye. Introduced in 2024, the opal finish of the Melt Chandelier is available with either a gold or silver suspension kit and ceiling canopy. This finish is reminiscent of natural pearls when switched off and provides an ethereal, opalescent glow when switched on.

The Melt chandelier light is available in a small or large size, with the small size made using four shades and the large size made using seven shades. Each version has an explosive and unique look, being useful as a central piece in any setting. The show-stopping aesthetic and the effective glow make this chandelier lamp perfect in many spaces, whether used alone in a small room or in multiples in larger rooms. Available in copper, chrome, smoke, gold or opal.
