PRODUCT DESCRIPTION

Designer: Carmine Deganello

Pablo UMA Mini LED Portable Table Lamp

The UMA Mini portable table lamp is a lamp for all kinds of possibilities. Its portable nature and ability to recharge allow this lamp to be transported with ease and taken wherever you go. The lithium battery holds 20 hours of charge when only the light is being used. However, this portable lamp includes an **integrated Bluetooth speaker** that produces high-quality sound. When the light and music are being used then the charge lasts a total of 15 hours.

The premium leather strap handle at the top of the UMA Mini encourages you to pick it up and transport it to wherever needs an ambient addition of light and sound. The UMA Mini LED portable includes a **touch-sensitive, full-range volume dial with dual light level control** all located at the top of the lamp. This allows for easy adjustment of both the light output and the sound output. The Bluetooth speaker can also be controlled and adjusted using any connected smart device. The UMA Mini also includes a high-quality cotton bag with a leather drawstring that protects the product from damage when being transported.

At the back of the product, cleverly hidden, is the Bluetooth pairing button alongside the USB-C port and an AUX port. This USB-C port makes **charging and recharging the lamp easy and quick** and the addition of the AUX port allows you to plug in music if your device is not Bluetooth compatible. These added extras make this Pablo portable lamp a durable, functional, and practical addition to your home, outdoor area, or workspace.
