PRODUCT DESCRIPTION

Designer: Arturo Alvarez

a-emotional light Hipatia LED Portable Table Lamp

The Hipatia LED Portable lamp takes its name from Hipatia, the Greek philosopher, whose achievements in mathematics and astronomy helped lay the foundation in modern science. The Hipatia's cylindrical form and fluted texture evokes the look of a classic column. This lamp has been designed by Arturo Alvarez, a Spanish designer whose designs often reference nature while exploring simple, geometric forms.

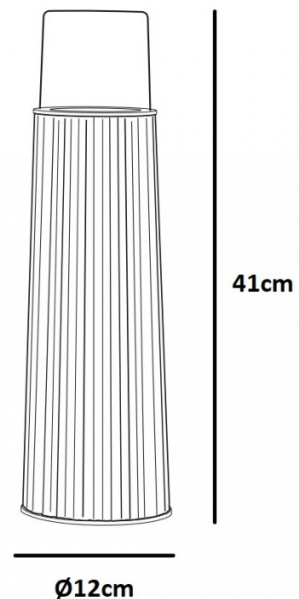

The rechargeable battery, which is chargeable via the included charging base and USB-C cable, allows you to take this lamp anywhere in your home, and the IP rating of 64 makes it suitable for outdoor use. Please note that while the lamp is suitable for outdoors, the base is rated IP20 so it can only be used indoors. The lamp features an integrated dimmer, providing up to 6 hours of light on its highest setting. You can also control the dimmer via the included remote control which features a 10-meter reach.

Each lamp is handmade in Spain using high-quality materials, such as painted stainless steel mesh which diffuses light from the lamp – creating a warm glow. This makes The Hipatia Portable perfect for creating ambient lighting throughout the home or to illuminate garden paths.
