PRODUCT DESCRIPTION

Designer: Bill Curry

Gubi Obello LED Portable Table Lamp

This portable Gubi table lamp was designed by acclaimed designer Bill Curry. He designed the Obello in his house in LA in the 1970s when the atomic age, space race, and pop culture were at the forefront of everyday life. Curry took his inspiration from the 1970s Los Angeles culture to create the Obello LED portable lamp. His drawing of this design was highly innovative of the time and was representative of the mushroom clouds that became strong imagery of the 1970s. Sadly Curry passed away that year and never saw the Obello in production, however, Gubi has taken the lead and has finally released the iconic Obello design.

Featuring a simplistic striking design, this lamp contains two LED modules that illuminate both the top of the shade and the stem so that the lamp has lit equally and peacefully. This peaceful glow can be dimmed with ease from the integrated dimmer switch located on the base of the lamp. Once fully charged, this lamp can provide a warming ambiance for 40 hours. The rechargeable nature of this lamp allows for **ultimate portability** and its **dimnable nature** allows you to create the perfect atmosphere wherever you go.

The Obello portable is also highly durable, this lamp is **outdoor friendly** and with its 44 IP rating, it can withstand a light rain shower and be around soil and sand. This durability is paired with the delicate design of the Obello portable. The **skilled craftsmanship** of this lamp results in a stunning practical design. The mouth-blown frosted glass creates a beautifully diffused light that brightens any space, indoors or out.
