PRODUCT DESCRIPTION

Designer: BIG

Slicing Stem LED Floor Outdoor Lamp by Artemide

The Slicing stem floor lamp is part of the [Artemide Slicing collection](#) designed by the design collaborative BIG. Wanting to explore the interchange of space and nature, the designers created a light that was signified by overlapping slats which in turn hide and reveal the integrated LED light source.

Emitting a warm glow, the Slicing stem floor light can be used in a multitude of exteriors, being useful for homes, hospitality settings, professional and commercial environments, whether you need to light a pathway or create a pleasant ambience in a garden.
