Karman Abachina LED Floor Lamp

The Abachina LED floor lamp is a stunning modern floor lamp designed by Edmondo Testaguzza, a German designer who uses research and passion to create products with a 'high aesthetic' that 'add value to a space'. The blown glass spheres appear suspended within a rectangular metal frame in a configuration that Karman describes as 'resembling a game'. This element of fun within the design makes for an intriguing light that adds a stylish modern touch to your interior.

Available in two stunning monochrome finishes, black and white, this geometric LED floor lamp can easily suit any interior. The option for either switch on cable or rechargeable again makes it easy to place and enjoy this Abachina floor lamp however or wherever you wish. The rechargeable version includes a charger that allows you to fully charge the battery and enjoy 6 hours of stunning light that will illuminate the surroundings. The switch on cable version features an in-line dimmer that allows you to alter the light intensity to the perfect lumen output for your space. The [Abachina collection](#) also features an outdoor floor lamp and a wall light, both of which also demonstrate the simplicity and beauty of the design. This floor lamp is also available in a larger size, please [contact us](#) if you would like more information.
