PRODUCT DESCRIPTION

Designer: Edmondo Testaguzza

Karman Abachina LED Wall Light

The Abachina LED wall light is a modern and intriguing wall light that uses its lightweight aluminum frame and frosted blown glass spheres to create the impression of an illusion. The mounted wall light can be used indoors and outdoors to bring a soft and diffused glow to your home, garden or commercial space. The designer, Edmondo Testaguzza, uses his attention and passion for research to create new and exciting designs that add a modern twist to a simple wall light design.

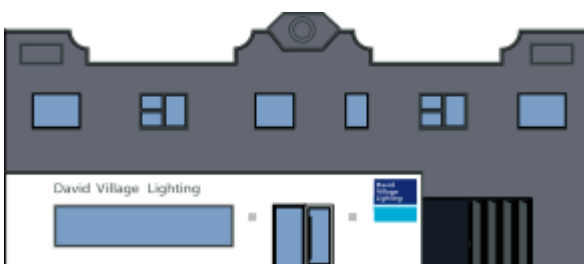

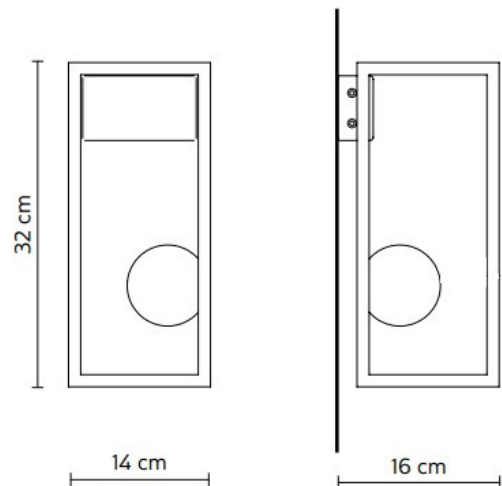

This Karman LED wall light is available in two sleek monochrome colours, black and white. Both of which exaggerate the stunning spheres of light that almost appear to be floating within the metal frame. Due to its high IP rating, this wall light can be used as an interior or exterior light and brings a designer touch to anywhere in or outside your home.
