Designer: Space Copenhagen

Gubi Howard Chandelier

The Howard Chandelier by Gubi demands to be noticed with its sleek and graceful demeanour, hanging elegantly, shining a warm light upon a dining table or surface. Inspired by Space Copenhagen's fascination with the greatest city in the world, the Howard Chandelier incorporates the industrial grittiness of New York City with the chic sophistication of the urban world. The Howard Chandelier makes a statement for any room, it could be in a grand stately home or a cosy, family dining room, and it immediately draws attention to its industrial splendour and charm.

Gubi's Howard Collection focuses on the aspect that details matter. They highlight tiny details to make a lighting fixture look great and mix hard, dark materials with soft, warm light and shapes. Its delicate, slender arms are made of metal with brass detailing providing a strong, stable structure for the delicate bone china or gunmetal lamp shades. The Gubi Howard Chandelier is available in four-arm and six-arm varieties, with gunmetal dark or classic bone china white lampshades. The four-arm structure is available as a short-arm or standard option. The six-arm chandelier could be hung as a centrepiece in a grand hallway or living room with a high ceiling, lighting up and filling the whole room with a warm light. The four-arm could be hung low over a cosy corner for eating dinner or completing tasks. The classic aesthetic of Gubi's design brings a statement to any public or private space.

Please Note: The Gubi Howard Chandelier can now be supplied with shorter pole lengths upon request. Please [contact us](#) for more information and pricing.
