PRODUCT DESCRIPTION

Designer: Carlotta de Bevilacqua

Artemide Vector 40 Semi Recessed Light

The Vector semi-recessed light is perfect to use in interior spaces and directs the beam light at an angle. The Vector 40 spot can rotate 360 and incline by 90. A narrow beam angle of 20 means the light can spread evenly and be targeted. The light is available in 4 colour options, white, copper, silver or bronze and emits a warm white light. Vector can be supplied with or without an installation trim. The Vector Trimless requires plastering in, whereas the Trimmed Vector is a good solution for when plastering in isn't a possibility.

Please Note: The Artemide Vector 40 can be dimmable via DALI dimming systems when supplied with the relevant driver. [Contact us](#) for more information and pricing.
