PRODUCT DESCRIPTION

Designer: Filippo Mambretti

Prandina Sino LED Table Lamp by Filippo Mambretti

The Sino Collection by Prandina tells a story of light, volume and precious materials. Designed in Italy by Filippo Mambretti, the Prandina Sino Table Lamp has an opal, mouth-blown glass lampshade set on a tubular, elegant structure. The design of Sino is characterised by lines and shapes that create a minimalistic silhouette, suitable for different interior contexts.

For the Sino Table Lamp, Prandina have used the ancient technique of mouth-blown glass to create a diffuser that accentuates light and emphasises its properties. The shade creates a glare-free light, producing a calming effect for bedrooms, living rooms or work and study, but could also fit perfectly in a business office. The diffuser enables light to travel in two different ways, directly onto a surface and indirectly around the room and environment. This means it provides functionality for two different purposes. It could be used as illuminating a bedside table for a focused reading lamp with direct light, whilst also lighting up the space around the product indirectly.

The Sino Table Lamp is available in gold or black for a refined effect or white for a more minimalistic look. The structure is made of galvanised metal and the lampshade is made of crystal. The Sino is dimmable and has an integrated LED light source, with a 2700K (warmest white) colour temperature. Sino is also available with a 3000K (warm white) colour temperature on request. Each finish also comes with a different colour fabric cable. White has a matching colour cable and Black and Gold have a black cable.

PRODUCT SPECIFICATION

Light Source: 4W, 2700K, 505 lumens

IP Code: 20

Dimming: In line dimmer included on the cable.

Dimensions: 43.5cm height
27cm width
23cm shade height
21cm shade width
200 cm cable length
