PRODUCT DESCRIPTION

Designer: Yabu Pushelberg

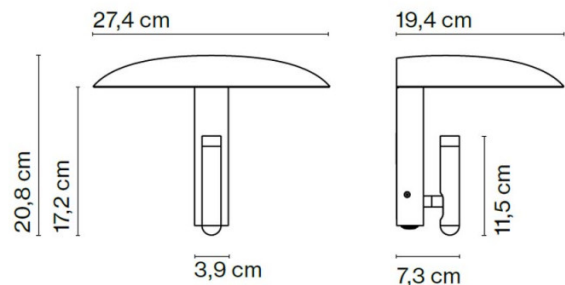

Marset Konoha LED Wall Light

The Konoha LED Wall Light was designed by George Yabu and Glenn Pushelberg for Marset, and released in 2023. This adjustable wall light can be manoeuvred 360°, and invites users to interact with it and use it throughout the day, utilising its multiple functions. The designers have taken a number of variables into account, especially those linked to our emotions; light is arguably the most intimate element in an environment, so its design must be thoughtful, functional and purposeful. The spotlight emits a soft beam of light; the shade, like a hat, covers the spotlight, allowing the illumination to be directed upwards, reflect off the inside and create a warm ambience. If instead the spotlight is focused downwards, it projects a beam of direct light, transforming the fixture into a functional reading lamp.

The Yabu Pushelberg design studio, which is world-renowned for its many hospitality projects, believes that every room needs direct and ambient light, which is why they have chosen to include both functions in a single design. Marset Konoha LED Wall Light can be used in waiting rooms, bedrooms or hotels. It can also be used to illuminate walkways, a wall lamp in restaurants or bars; and even a way to bring ambient lighting to hotel entrances.

PRODUCT SPECIFICATION

- Light Source:** 2.1W, 2700K, 199 Lumens
- IP Code:** 20
- Dimming:** Integrated on/off switch on the product.
- Dimensions:**
 - Shade Width: 27.4cm
 - Shade Depth: 19.4cm
 - Full Height: 20.8cm
 - Base Height: 17.2cm
 - Base Width: 3.9cm
 - Light Source Height: 11.5cm
