PRODUCT DESCRIPTION

Designer: Jordi Canudas

Marset Dipping Light LED Wall Light

The Marset Dipping Light Wall Light was designed by Jordi Canudas' and was born from his experimentation with lights. His process consisted of dipping a lit bulb into paint several times to see the effects and possibilities, the result is multiple layers of paint that diffuse the light, softening its intensity. The paint becomes a screen, colouring the light and giving it texture, when turned on its varying shades of paint sift and filter the LED light source, creating a magical and colourful lighting effect in your space.

The Dipping Light LED Wall Light emits a diffused ambient glow, making it perfect for areas of relaxation in both residential and commercial environments. The spherical diffuser is available in five colours, Pink, Orange, Blue, Green or White - making it easy for the Dipping Light to adapt to a wide range of contemporary interiors. Display this lamp in your hallway, lounge or dining area. Similarly, Dipping Wall Light is a beautiful accompaniment to spaces in the hospitality industry such as bars, restaurants, cafes and hotels.

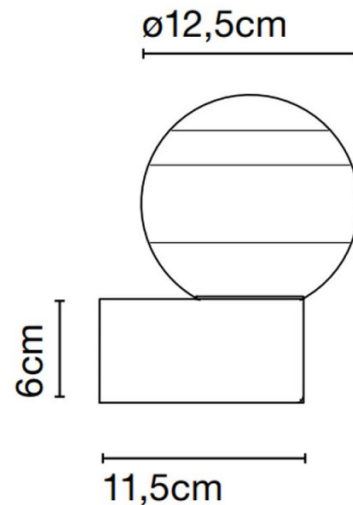

PRODUCT SPECIFICATION

Light Source: 5.68W, 2700K, 645 Lumens
