PRODUCT DESCRIPTION

Designer: Christophe Mathieu

Marset Palosanto LED Outdoor Bollard

The Marset Palosanto LED Bollard is a versatile outdoor lighting solution, the light source is height adjustable, allowing you to move it up and down the structure. Not only this but each light can be rotated manually by up to 360 degrees. This ensures that the Palosanto is a subtle directional lighting solution, it can be utilised on pathways, patios and even in shrubbery - the position of the light to adapt to the growth of surrounding greenery. Palosanto is available in three heights: 30cm, 60cm or 90cm. The smaller two bollards include one spotlight, whilst the taller 90cm version can have either one or two light sources.

Designed by Christophe Mathieu, the Palosanto Bollard is crafted from hard-wearing materials, protecting it from an exterior environment. This lighting solution also features a honeycombed griller which prevents glare, reflects the illumination and releases it through the back of the lamp, which gently illuminates the body of the diffuser and provides a subtle indirect light. This glare cell comes included, but can also be removed from the product if needed. Palosanto is the definition of simplicity, easy to install, and can be integrated into almost any outdoor project, whether residential or commercial.

Please Note: The Marset Palosanto does not include a power supply, 24V remote power supply to be ordered separately.
