PRODUCT DESCRIPTION

Designer: Boris Klimek

Brokis Geometric LED Pendant

The Brokis Geometric range offers a wide variety of colourful lighting solutions, varying in shape and size. Geometric broadcasts an expressive structure that is crafted from BROKISGLASS, a distinctive material utilised by Brokis that is made from recycled glass. The collection is defined by bold geometric shapes, with a solid black profile, that contrasts beautifully with the sculptural elements of the glass. The circular and oval Geometric Pendant Lights work well as solitary pieces or can be arranged in clusters for larger spaces that require a more dramatic installation.

Resembling stained glass, the Geometric Pendants add a creative contemporary flair to your space, eliciting a subtle aesthetic tension that amplifies the overall visual experience. Geometric is available in a wide range of finishes, so you can add a burst of bold colour or stick to a more neutral colour palette; for even more expressive freedom and a truly bespoke lighting experience, clients can specify a different colour of glass in each of the two sections of light.
