PRODUCT DESCRIPTION

Designer: Tom Dixon

Mirror Ball Fat Cone LED Floor Lamp

The Tom Dixon Mirror Ball LED Floor Lamp is created through the process of blowing plastic into perfect sphere moulds and internally colouring it with a metallic finish. The [Tom Dixon Mirror Ball](#) was initially a failure in design, the brand originally aimed to create a collection of lights which disappeared into their surroundings but luckily accomplished the complete opposite, and created the Mirror Ball.

Tom Dixon utilises polycarbonate in these lamps as it is more durable, lightweight and less breakable than glass. In this instance, the iconic Mirror Ball Shade perches atop a cone-shaped base. Mirror Ball reflects its environment and projects a peaceful ambient light. The Mirror Ball Fat Cone LED Floor Lamp is a beautiful addition to both residential and commercial settings, especially in living areas, dining rooms, hallways and bedrooms.
