Normann Copenhagen Vekst Pendant

The Normann Copenhagen Vekst Pendant was designed by Simon Legald, a graduate of the Royal Danish Academy of Fine Arts. Vekst pendants boast numerous arms which hang downwards, resembling the branches of a willow tree. Each branch has an etched opal glass diffuser attached at the end, housing the inner light source, whilst the arm itself is made from powder-coated steel. For this design, Legald drew inspiration from nature and more specifically the symmetry seen within nature.

The Normann Copenhagen Vekst Pendant is striking and elegant, a great addition to any room above a dining/coffee table. The pendants look best hung alone or in pairs to create a statement against a plain background in more minimalistic interiors.

Similarly, they can be displayed alone or alongside the [Vekst Wall Light](#) for a cohesive interior design.
