PRODUCT DESCRIPTION

Designer: Boris Klimek

Brokis Convex Pendant

The Brokis Convex Pendant is an innovative design by Boris Klimek, it is crafted from Brokisglass with a minimalistic metal structure and suspension kit. Brokisglass consists of taking wasted glass shards in order to create a new upcycled material, reducing waste and harbouring a positive impact on the environment. The Convex Pendant Light highlights the beauty and optical properties of the glass and is well suited to a broad range of applications in both residential and commercial spaces.

This luminaire is available in two sizes and offers the choice between clear triplex opal, or a combination of clear triplex opal and grey triplex opal, where the darker fragments gradually transition to lighter towards the centre of the glass. Convex emits a soft ambient downlight that is a beautiful lamp for dining areas, kitchens, living rooms and entryways.
