PRODUCT DESCRIPTION

Designer: Meneghello Paoelli Associati

Luceplan Doi LED Suspension

A creative luminaire with a big personality, the Luceplan Doi LED Suspension was designed by Meneghello Paoelli and consists of a thin cylindrical body which houses the light source and an accompanying circular counterweight. The components are easily adjusted - the light source structure is fitted with a magnetic strip, connecting it to the counterweight and allowing the user to define the position. The directional spotlight is not only adjustable in terms of angle but can also be easily dimmed, allowing you to further personalise the ambience.

Both components of the Luceplan Doi come in three colours (Black, White or Brass), allowing you to create a configuration that suits your interior and personal style. Doi boasts a big personality and can adapt to a range of modern interiors, for both residential and commercial spaces - especially in kitchens, dining areas and bedrooms. A beautiful addition to hotels, restaurants, bars and galleries.
