PRODUCT DESCRIPTION

Designer: John Tree

HAY Cupola Wall Light

The Cupola Wall was designed by John Tree for Hay in 2024, providing functional directional light without having to compromise on style. This wall light is equipped with a 360° rotating head and pivoting mount to provide localised, directional light to suit a wide range of interiors, and the natural anodised finish, combines a contemporary and industrial expression. Cupola allows you to take control of the illumination so you can direct the light where you need it and the in-line on/off switch means the light source can be easily controlled.

Crafted from durable aluminium, the HAY Cupola Wall Light is highly functional and can be used in many interiors as a task light or reading light, such as in bedrooms, lounges and offices. Perfect as a directional light, with the possibility to also provide ambience, this wall lamp utilises superior design. Display it alone or pair it with other designs in the collection for a more cohesive space.
