The Multipurpose Nobu Lamp is a modern reinterpretation of an industrial work lamp, boasting a classic architectural form but with many additional benefits. Fitted with integrated LEDs, the Table lamp is guaranteed a longer lifespan than regular bulbs and grants you full control of the light output - this can be adjusted via the built-in touch dimmer on the head of the lamp. The flexible arm and the adjustable head further enhance the personability of this light, you can create a focused direct light for workspaces or other areas you may need to focus in, and you can also adjust the lamp to produce an indirect light and curate a warm and relaxing environment.
