PRODUCT DESCRIPTION

Designer: Carlotta de Bevilacqua

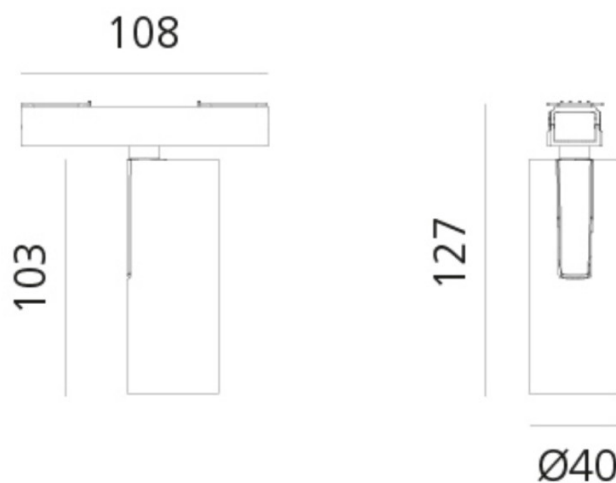

Artemide Vector Magnetic LED Track Light

The Artemide Vector Magnetic Track Lights are compatible with the [A.24 Magnetic Track](#) and are available in five finishes and three different beam angles (spot, flood, wide flood). These track lights boast a variety of fittings, designed to suit both the recessed and ceiling track system.

Each variation is fitted with a junction arm integrated into the spotlight's body to keep the barycentre aligned with the track and prevent any imbalance. The junction allows 360° rotation and 90° tilting for maximum emission adjustment freedom and allows you to direct the illumination to where it is most needed. This track spotlight also offers varying colour temperatures (varying from very warm to white light) and a range of add-on accessories. The Vector can hold up to three accessories; these accessories include soft filters, adjustable dowsers and a lens for elliptical emission.
