PRODUCT DESCRIPTION

Designer: Wilmotte & Industries

Mouette Symmetric by Artemide  
Architectural

The diffuser, with a specially shaped wing, is a single piece, produced using rotational moulding technology; this technique allows excellent even light emission over the whole surface, without areas of shade. The lamp body has an aperture in the upper part to insert the light source and for maintenance. Also available in Asymmetrical version (see LA9004-AS). The lamp can create various lighting compositions by combining a number of units.
