PRODUCT DESCRIPTION

Designer: Marc Sadler

Fabbian Beluga Single Track Light

Designed by Marc Sadler, the Fabbian Beluga Single Track Light consists of a transparent 24% lead crystal diffuser that can be easily adjusted and directed along a track system in order to provide direct task lighting in residential and commercial settings. This personalisation allows you to precisely brighten some spots in the room or decorate walls and ceilings with light.

The extreme simplicity and the geometrical purity of this lamp allows the Beluga Track Light to be used in almost any area. It is a functional addition to offices, contemporary bars and restaurants, lobbies and reception areas. Beluga Track can also be used in residential environments and works especially well in kitchens, dining areas and dressing rooms.

Please note, the images show the light fitting with a PAR-20 GU10 lamp but this light source has now been replaced with a PAR-16 GU10 lamp which is slightly narrower and therefore leaves a slight gap between the lamp and the rim of the light fitting. Lamp not included

Fabbian Beluga Track sold separately, please [contact us](#) for more information and pricing.
