PRODUCT DESCRIPTION

Designer: Ross Lovegrove

Skydro LED by Artemide

Designed by Ross Lovegrove, Skydro is instantly recognisable as his design. The ceiling light is comprised of numerous mirrored pebbles, each reflecting light and the nuances of its surroundings. The light is cast from the protruding pebble and onto the larger ones that are 'sitting' on the ceiling. This modules are made of injection moulded thermoplastic and have a metal finish. Skydro is both a light and sculpture, interchanging depending on the use. The light is instantly noticeable even when not in use, as it absorbs energy from its surroundings.

The Skydro light can be customised and you can supplement additional units and create your own pattern. Each installation can be unique and as big or small as you want. Skydro lights are ideal for large spaces, and for both residential use and hospitality.

PRODUCT SPECIFICATION

Light Source:	29W, 3000K, 1662lumens
