PRODUCT DESCRIPTION

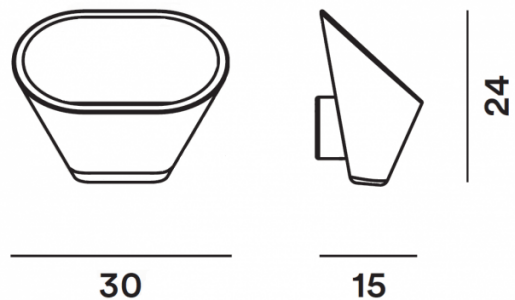

Designer: Paolo Lucidi + Luca Pevere**Aplomb Wall Light by Foscarini**

The Aplomb wall lamp continues a project, which began in 2010 with Paolo Lucidi and Luca Pevere for Foscarini. An exploration of the expressive potential of rough concrete made fluid in its mould creates a form that is thrilling to see, and touch, due to its special composition. Like the original pendant light, the Aplomb wall light has made concrete take a leap from the world of architecture and building to the home environment. The lamp has retained the assertive mark of its raw material but reinterpreted it for its new purpose.

The oblique shape of the diffuser allows for wide-ranging light diffusion. The concrete blocks the light completely and then releases it from both the large opening at the top and the smaller one at the bottom. The beam of light directed upwards is reflected onto the walls and ceiling. The more delicate beam of light directed downwards, by contrast, creates a sophisticated interplay of light on the walls.

The Aplomb wall lamp is available in grey, the natural look of concrete, as well as an elegant white and a warm brown. It is ideal in all rooms, which speak a direct, minimalist architectural language, especially those with touches of visible rough-hewn materials, or can be placed in sequence along walls or corridors.

PRODUCT SPECIFICATION

Light Source: 1 x 17.5W R7s (excluded)**IP Code:** 20**Dimming:** Dimmable via mains phase dimming.**Dimensions:** 30cm width
24cm height
15cm depth
