PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

Demetra Table Lamp LED by Artemide

The iconic and original sized Demetra table lamp was designed by Naoto Fuakasawa for Artemide Lighting. Fukasawa's design are a way to promote a simple and homogeneous harmony between an object and its user. His concept of 'Outline' is easily depicted onto the Demetra lights, with a streamlined design.

Demetra desk lamp offers a wide range of movement, with a flexible head/diffuser and adjustable arm. The diffuser can be tilted and rotated, granting you an ease of use and direct the light in various positions. The arm can be tilted up to 45°, while the head allows for more movement on both the vertical and horizontal axis. An integrated dimmer switch, located atop the diffuser, ensures you can effortlessly control light intensity.

The Demetra table light is also available with a [motion sensor](#), which detects movement activity and switches itself off after 12 minutes. The [Demetra Collection](#), contains a large range of lights, floor and table lamps, wall lights and spotlights. Fukasawa boosted the collection with addition of the [Demetra Professional](#) task lights, which provide a maximum performance and highest illuminance.

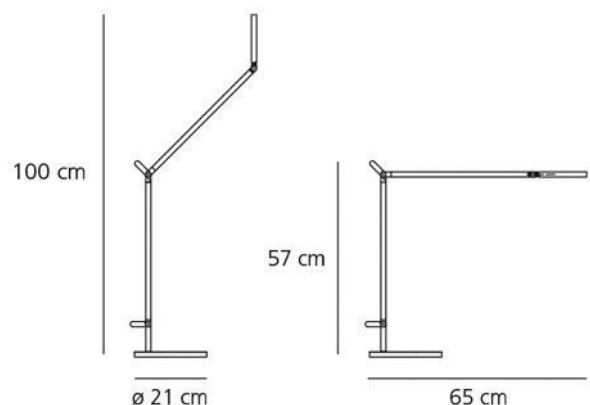

PRODUCT SPECIFICATION

Light Source: 8W, 3000K, 385 lumens

IP Code: 20

Dimming: Integrated microswitch dimmer on the product.

Dimensions: Ø 20 cm base
57 - 84 cm height
63 - 96.5 cm depth
