PRODUCT DESCRIPTION

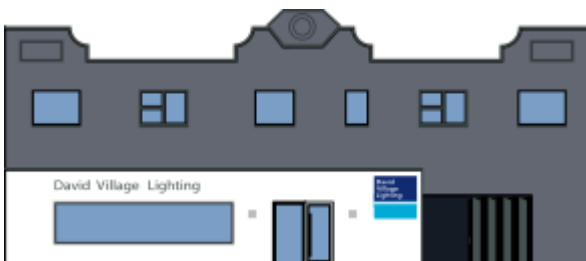

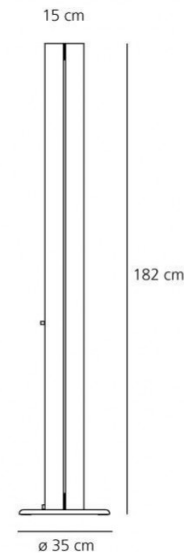

Designer: Gianfranco Frattini

Megaron LED by Artemide

The modern edition of the 1979 design by Gianfranco Frattini, the Megaron now comes equipped with an integrated LED light source. A timeless design, the floor lamp becomes quite convincing and emits an indirect uplight. While now it houses LED technology, the design itself lacks nothing from the original Megaron in its design and lighting properties. Frattini became an industrial designer only out of necessity as he came to find a lack of lights and furniture for his interior designs. Megaron is available in a white or black finish, and comes with an integrated dimmer on the body. You can also pick your colour temperature of choice, between 2700K or 3000K.
