PRODUCT DESCRIPTION

Designer: Formfjord

Fabbian Giro LED Pendant

The Fabbian Giro Pendant utilises soft geometric shapes and LED technology. Designed by Formfjord, the Giro is composed of 32 metallic rings that are linked together to form a sphere. The design studio wanted to create a lighting solution that was large but also open and lightweight, resulting in a modern yet minimalistic LED suspension. Thanks to its size Giro can be installed in large environments and adds character and value to the environments in which it is inserted. Furthermore, the LED plate can be installed at will in any of the rings of the correct size, to be able to direct the light where necessary and personalise your experience.

Giro is a delicate contemporary lighting solution, available in two sizes and two sleek finish options (either White or Anthracite Grey). It can be installed individually or in larger clusters of varying sizes and even colours, no matter which installation you choose, the Fabbian Giro is sure to be a statement piece in your space. The spherical shade adds a unique contemporary touch to almost any interior and is especially eye-catching in large entryways, lobbies, kitchens and dining spaces.

PRODUCT SPECIFICATION
