PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Plaff-on! LED Ceiling Light

In 2020, Marset redesigned the iconic Plaff-On lights to slightly different dimensions, as well as making them airtight and waterproof. The IP rating of 54 or 65 allows you to install the Plaff-on ceiling or wall lights to interior and exterior settings, including bathrooms. Marset's Plaff-on light was aptly named after the Spanish word for "ceiling", it was intended to be a simplistic and no-frills design. Plaff-on's beauty lies in its simplicity and purity.

Marset Plaff-on ceiling light consists of a central light source diffused through an opal glass shade and surrounded by an aluminium ring. This design creates multiple lighting effects: a functional downlight which is softly diffused, the aluminium ring acts as a reflector and creates a halo on the surface of the ceiling.

Joan Gaspar's design is sleek and minimal, ideal for illuminating hallways, living spaces and places with lower ceilings. Sure to give a beautifully diffused light whilst providing illumination for tasks.

Please Note: only the smallest Plaff-on!, with a 16 cm diameter has an IP65 rating. The other two larger sizes retain an IP54 rating.

PRODUCT SPECIFICATION

Light Source: Plaff- on! 16:
8W, 2700K, 224 Lumens

Plaff- on! 33:
28.5W, 2700K, 2000 Lumens
