PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Lederam W2 Wall Light

Catellani & Smith Lederam W2 Wall Light is the latest evolution of Eco-Logic Light and combines LED technology with a new copper leaf finish. These small discs with their soft, warm colour enclose a next-generation mains voltage LED module, so no transformer is required and they can be easily dimmed. The light source is emitted against the wall, resulting in a warm indirect light that is guaranteed to create a calming ambience.

A gorgeous addition to hallways, living areas, kitchens and bedrooms. It can also assist in optimising commercial spaces, specifically in the hospitality industry. The Lederam W2 is crafted from metal with an aluminium disc and nickel joint, and is available in different combinations of colours.

Also available in a chrome finish. For further details, pricing and orders please [contact us](#).
