PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Light Stick LED Table Light

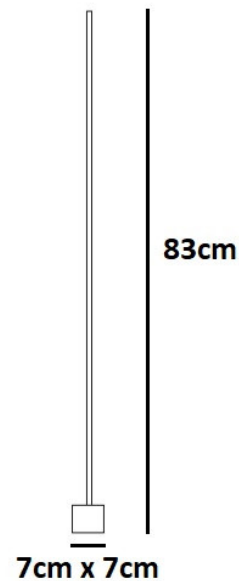

The Light Stick LED table lamp by Catellani & Smith was one of Enzo Catellani's first ventures into a minimalist design. Inspired by the simplicity and ease of the new LED circuits, that have transformed the world of designer lighting, Catellani designed the Light Stick table lamp to exploit this new modern technology. The LED circuit is fed through the copper pipe and exposes the six LED lights that create a bright wide beam of light out the back of the copper rod.

This thin elegant copper rod is plated in a nickel metallic finish that creates a luxurious and timeless effect. This timelessness allows this table lamp can be placed anywhere in the home and in multiple interiors as it blends beautifully into the surroundings.
