PRODUCT DESCRIPTION

Designer: Luca Nichetto

Plass Pendant Light by Foscarini

The Plass pendant light was so named by combining the words plastic and glass which act as the source and inspiration of the design. The pendant was designed to reinterpret the Italian tradition of glass making, by using contemporary technology to mould polycarbonate.

The modern process has resulted in a pendant light that has unique and irregular features that make it completely personal to the user. The Plass pendant light comes in 2 chic colours, light blue and grey, which reflect the light in a lovely way. This light is suitable for many settings, both big and small, and can be used singularly or in clusters to produce a gorgeous light feature.

This pendant light is also available in a larger size. Please [click here](#) for more information.
