PRODUCT DESCRIPTION

Designer: Alberto Meda & Paolo Rizzatto

Luceplan Otto Watt LED Wall Light

The Otto Watt wall model is a great example of efficiency and flexibility designed by Alberto Meda and Paolo Rizzatto and produced by Luceplan. It harnesses a minimalistic yet industrial design, is fitted with dimmable LEDs and boasts a reflector with a glare free filter. The diffuser can be oriented 360° for direct or indirect lighting and the LED source enables the user to adjust the colour temperature between warm and cool light, by rotating the diffuser - the available settings range from 2400 to 3600 Kelvin.

Otto Watt supplies the ideal lighting conditions for all circumstances. The wall lamp hosts an easily adjustable body made up of two arms that generates extensive movement - creating a direct light source and making it a perfect task light. The Otto Watt Wall Light is a must have addition to your workspace, living room or favourite reading spot.
