PRODUCT DESCRIPTION

Designer: Serge & Robert Cornelissen

Paraph LED Table Lamp by Prandina

The Paraph LED table lamp is characterised by its dramatic curved design that leaves an impression. The body is made from aluminium, shaped into a thin swirl that is intriguing and distinct. The lamp can rotate a full 360° from the base, allowing you to direct the light where you need. The head can also be adjusted, giving you versatility and convenience.

The Paraph table light has an integrated LED light source which emits a strong light with a 3000K (warm white) colour temperature. This table lamp is perfect for many settings and will work best as a reading/task because of the directable light. The sleek and contemporary design means it can slip in any design scheme and can work in offices, lounges, kitchens and many more. Pair with the [Paraph LED floor lamp](#) for a consistent lighting scheme.

This version of the Paraph table lamp is non-dimmable. A dimmable version is available on request. Please [contact us](#) for more information.
