PRODUCT DESCRIPTION

Designer: Mengotti/Prandina

Lin Wall Light by Prandina

The Lin wall light allows the user to interact with their light, using a simple design aesthetic and apparatus to create a stimulating and modern light fixture. The wall bracket is made from pressed crystal which holds the light bulb (which is excluded from the purchase) in place to create a cylindrical wall light that uses the light bulb as its silhouette.

The Lin wall lamp is both contemporary and sleek, using the given materials to produce an interactive and intriguing light. The light emits a strong, yet warm glow making it perfect for many settings both in home and commercial spaces. You can buy one for a smaller room or buy several to line the room and create a big illumination.
