PRODUCT DESCRIPTION

Designer: Jaime Hayon

Passepartout JH10 LED Ceiling / Wall Light by &Tradition

The Passepartout JH10 LED ceiling/wall light is a part of the [&Tradition Passepartout collection](#), designed in 2016 by Jaime Hayon exclusively for &Tradition. The brand wanted to produce a spot light that was both versatile but not invisible, something that could seamlessly fit into a space without losing character. Creating a light that is both intriguing yet subtle, the Passepartout JH10 wall/ceiling light is small, decorative and produces a light that disperses well throughout the room.

The Passepartout JH10 can be used in many areas, whether a corridor, a big room or a small space, its adaptability is paramount and can be used on both walls and ceilings. The wall/ceiling light comes with a built in LED module that produces a calm light that is long-lasting, efficient and energy saving. The two luxurious colours, bronzed brass and gold, means the light will still make an impact on the room without being imposing. Perfect for many rooms and spaces, match with other lights from the collection to create light features that are functional and aesthetically pleasing.

All Passepartout lights are now set up as dim-to-warm, meaning that as you dim the light, the colour temperature is gradually reduced to a warmer colour.
