PRODUCT DESCRIPTION

Designer: Klaus Begasse

Reeds IP67 by Artemide

Modular and whimsical, the Reeds exterior floor lights create a spectacle of light, or some may even say a forest that came straight out of a fairy tale. Whether you choose to use it in an exterior or interior environment, Reeds will add a decorative ambience to any space.

Reeds is available in two sizes, Reeds Single and Reeds Triple, and are modular; meaning you can create your own pattern and design a unique, interior or exterior, decor. It is the shape of the base which allows you to slot different lamps together, like pieces of a puzzle and create your own installation. The technology behind the Reeds lamps stems from PMMA rods which house high-performance LED strips, making them efficient and eco-friendly at the same time.
