PRODUCT DESCRIPTION

NJP Floor Lamp by Louis Poulsen

The NJP floor lamp was designed by Oki Sato and is a new interpretation of the classic silhouette and function seen in the renowned [Anglepoise](#) lamps. The angle of the shade and arm can be adjusted to provide a very handy light for reading or tasks. The floor lamp comes with an integrated LED light source with the choice between a 2700K (warmest white) or a 3000K (warm white) colour temperature. The floor light also has switch with 2 dimming options and a timer function that can automatically switch off the lamp after 4 or 8 hours if needed.

A very versatile and functional lamp, the NJP floor light is available in 4 lovely and subtle colours, making it perfect for many settings and interiors. You can use in your lounge for a cosy, warm atmosphere, or in your office for an effective working light. You can also pair with other lights from the [Louis Poulsen NJP collection](#) for a consistent lighting scheme throughout your space.
