PRODUCT DESCRIPTION

Designer: Cheshire Architects

Resident Foundry LED Floor Lamp

The Resident Foundry LED Floor Light is a graceful blend of form and function, standing tall at 1.9 metres. Designed and handmade in Auckland, New Zealand, this floor lamp is defined by its seamless aluminium structure, which outlines a striking rectangular shape in space. The integrated LED light source casts a warm glow, elegantly diffused through frosted acrylic, providing ambient illumination for any room.

The Foundry's stability is achieved through a partially polished, solid bronze counterweight, which cantilevers its height while adding a touch of contrast and texture. Ideal for compact spaces, this versatile floor light enhances both residential and commercial environments, offering a modern yet timeless aesthetic.
