PRODUCT DESCRIPTION

Designer: Markus Johansson

Carronade Pendant by Le Klint

The Carronade pendant by Markus Johansson for Le Klint was created using the idea of a small lamp, inspired by a cannon, shooting light where directed. This small pendant light is ideal used as a single working light, but are also small enough to create a beautiful cluster either in a row or at various heights and angles.

The [Le Klint Carronade collection](#) is a 2016 range made in the same high quality that other Le Klint products are known for, with attention to detail being crucial. In this collection the materials used are stunning American Walnut, along with brass finishes. The collection also includes a large pendant, a table/wall lamp, a multi-functional floor lamp, and a large floor lamp.

Carronade lights are available in several colour/material options. Mix your own favourite by choosing the colour finish on the shade, with the wood option and either metal option. Please [contact us](#) for more details.
