PRODUCT DESCRIPTION

Designer: Bertjan Pot

NR2 LED Suspension Light by Moooi

The successor of the Moooi [Non Random](#) light, the NR2 joined Moooi's collection in 2015. NR2 was first presented at Milan Design Week in 2016 and has since been part of Moooi's permanent collection. The Non Random lights, as well as the Random suspensions, were Bertjan Pot's experiment with shapes and material. A carefully woven circular shade, with a black or white fibreglass resin thread that is carefully placed in a non random pattern. The NR2 does not create a visual block, but is a rather lightweight and elegant bubble of light. The suspension is equipped with LED technology, emitting a soft and symmetric glow into every direction.

The NR2 lights are available in black or white colour, with a matching cap, cable and ceiling canopy and in 2 sizes, medium or large. A long cable of 400 cm allows you to install the NR2 in any interior, whether residential or commercial. The lights can be hung as a standalone, or you can add more NR2 lights and create a stunning and unique installation that will definitely draw attention.

PRODUCT SPECIFICATION

Light Source: **Medium** - 12W, 2596K, 576 Lumens
Large - 26W, 2468K, 1047 Lumens
