PRODUCT DESCRIPTION

Designer: Poul Henningsen

PH 5 Pendant Light by Louis Poulsen

We currently have limited stock of a selection of these items in our [Clearance section](#).

Poul Henningsen designed the PH 5 pendant back in 1958 after his very successful PH series and in response to changes in light bulb size and shapes. The light fixture radiates a beautiful and warm glow that shines both upwards and downwards and is always glare free. The original design is now available in 21 finish options, 19 coloured and 2 metallic ones, thus allowing you to choose a PH 5 pendant light that fits best with your home decor. Alternatively, the pendant can be hung in multiples using different finishes, creating your own colourful PH 5 cluster.

The copper and brass surfaces are untreated. This means that over time the surface will form a patina, adding to its beauty. That process might have already begun when the product is delivered.
