PRODUCT DESCRIPTION

Designer: Space Copenhagen

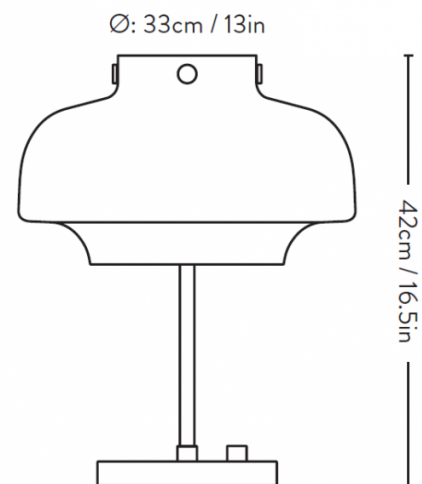

Copenhagen SC13 Table Lamp by &Tradition

A part of the [&Tradition Copenhagen collection](#), the Copenhagen SC13 table lamp is distinguished by its dualistic design, a contrast between the refined mouth-blown opal glass lampshade and the durable brass stand/base. This contrast is typical of all designs made by Space Copenhagen, which also matches the ethos of &Tradition to make contemporary classics that meet modern needs through traditional techniques.

The Copenhagen table lamp makes the most of modern technology with a dimmable function that also changes colour temperature from 2200K-2800K. With recent research showing that light temperature effects how we live from day to day life, this table lamp is perfect for providing a warm white light that can be used to create a your own nice, cosy environment perfect for living rooms, dining rooms, bedrooms and most importantly your wellbeing.
